(5 строки)

python_courses=#
```

1. SELECT \* FROM workers WHERE id = 1 OR id = 2 OR id = 3 OR id = 7 OR id = 9 AND login = 'user' OR login = 'admin' OR login = 'ivan' AND salary > 300;
2. SELECT \* FROM workers WHERE id BETWEEN 3 AND 10 AND salary BETWEEN 300 AND 500;
3. SELECT MAX(salary) FROM workers;
4. SELECT MAX(age) FROM workers GROUP BY salary;
- 5.
6. SELECT DATE\_ADD(date, INTERVAL + 1 YEAR) FROM workers;  
( ОШИБКА: ошибка синтаксиса (примерное положение: "YEAR")

СТРОКА 1: SELECT DATE\_ADD(date, interval + 1 YEAR) FROM workers;

Не могу понять в чем ошибка. Может в том что дата не integer?)

7. SELECT MAX(salary) AS max FROM workers WHERE age = 25;

8. SELECT \* FROM page FULL JOIN category id AND name ON category.id = page.id AND category.name = page.name;
